

# Small Group Benefit Solutions

## Our Purpose

MyHealthily provides affordable healthcare coverage to small businesses and the agents who serve them. We created a platform to quickly quote, enroll, and service small group benefits. By providing these resources and attention, we can help small businesses to lower their number of claims and incurred costs throughout the year.

## The Problem

Brokers know the challenges of servicing small business clients on a profitable basis because:

1. There are less options to offer your small group clients.
2. The time and cost to quote and service continues to rise.
3. Because of this, the plan options you are offering clients at renewal are never less expensive –and don't have the potential for a dividend.

## The Solution

MyHealthily solves these problems for small groups and their brokers by:

1. Using proprietary software that identifies more options than you've ever seen.
2. Making sure our platform is easy to understand, easy to follow, and fully transparent.
3. Offering you our same system efficiencies which will save you time to earn more business.

With our platform, not only do we help make your life easier, but you get to retain 100% retail commissions. With our proprietary software you can go from inputting census data to submitting a quote in as little as 30 mins!

## Book a Demo

Win more business all while retaining 100% commission. Our trusted advisors will help answer questions and walk you through the enrollment process at a date and time that works for you. Scan or call (888) 272-1513 to see a live demo.
